- Working on web app performance optimisation
- Troubleshooting, testing and maintaining the core product software and databases to ensure strong optimization and functionality
- Following industry best practices
- Collaborating with other team members on how to improve our existing technology stack

## You are:

- Tech savvy
- Open to receive and apply constructive feedback
- Able to effectively communicate and present your ideas
- Detail oriented and persistent problem solver
- Fluent in English
- Self - motivated and independent

## What do you need to have?

- Full-stack engineering experience in the following languages: Object Oriented PHP, JavaScript.
- Minimum of 2 years of industry experience in programming
- University degree in computer sciences (or equivalent)
- Excellent knowledge of Laravel framework and RESTful API service
- Proficiency in JavaScript framework including jQuery
- Deep knowledge of HTML, CSS, Javascript, AJAX
- Experience with code versioning tool - Git
- Experience with databases, preferably MySQL
- Knowledge of Bootstrap

## Our offer:

- Opportunity for professional development
- Great financial package
- Flexible working hours
- Coaching and training to help you grow
- Various sports and team building activities

## Sounds interesting?
