

Presentation: IBIS Instruments Skopje seminar
Location: Aleksandar Palace, Skopje
Date: 19.09.2018.

AGENDA

10:00 - 10:30	Introduction	
10:30 - 11:45	Cybersecurity in the business innovation context As companies adopt technologies such as the Internet of Things, big data and mobility, security must be more than an afterthought. But in the digital era, the focus needs to shift from securing network perimeters to safeguarding data spread across the world. In this presentation we will focus on how organizations need an integrated cybersecurity vision in the wake of a fast forward cybercrime community that puts at risk the strategies developed for market leadership. <i>Presenter : Ana Maria Matejić, Senior Consultant, Ibis-Instruments</i>	
11:45 - 12:15	Pause	
	Hall 1	Hall 2
12:15 – 13:15	5G Mobile Evolution Journey <ul style="list-style-type: none"> • Cellular IoT Measurement Solution : Mobile IoT, NB-IoT and LTE-M, deliver trusted and cost effective low power wide area (LPWA) capability today, while forming the foundation of the 5G future and supporting IoT growth on a massive scale. Quality measurement of incoming technologies. • Radio planning and Spectrum management: delivery of promised 5G capabilities needs that current radio network design approach to a far more advanced level which ATDi offers with advanced advanced network planning, optimization and management software that predicts with an unmatched precision the effective coverage of base stations and incorporates all kind of standards and wireless radio IoT technologies. <i>Presenter: Jovan Cvijović, Regional Sales Manager - Nemo Wireless Network Solutions</i> <i>Presenter: Sanja Marković, Account Manager – Ibis Instruments</i>	Transforming Government through Digitalization <ul style="list-style-type: none"> • IBM® Netcool® Operations Insight is an analytics-driven operations center providing cross domain, correlation, enrichment and consolidation of millions of alerts/alarms and operational data into a single operational view, also empowers operations teams through real-time and historical analytics that can help identify, isolate and resolve problems before they affect business operations. • IBM Control Desk is advanced service desk software that delivers optimized, automated service management to help reduce costs and increase agility offering flexibility and depth of features, including simplified IT asset management and service automation. • IBM ESB is a service-oriented architecture(SOA) integration platform built on a uniform invocation programming model and a uniform data representation model. <i>Presenter: Jelena Đerisilo, Account Manager – Ibis Instruments</i>

13:15 – 14:15

Field operations quality control

- **Work Force Management for automatization and optimization of field force activities:** Right people in right place at right time for installation and inspection
- **Introduction of New Fujikura splicing machines 31S and 41S**
- **Advance tracking of field teams and their measurement activities with tools** for HFC, GPON, xDSL, GFast, optics, 100G...with analytics that indicates the quality of field force work and proactive *onsite* quality control of field activities

Synchronisation and Timing needs of NextGen ICT

Presenter: Viktor Nastev, Business Development Manager – Ibis Instruments

Digital Banking

Ibis Instruments Risk Management Solutions

- **Rating & Scoring**
Challenges of modern banking are primarily caused by: Regulatory changes, technological progress and introduction of new technologies, and constant profit increase requirements. Enhancement of the risk management system, enhancement of sales, are the proper answer to the posed challenges. In addition to the above solutions, enhance the risk management system using solutions we offer:
 - EWS – Early Warning System
 - Collateral Management System
 - Collection System
 - Default Detection System
- **IFRS** provisioning tool and a package of Consulting correction, rules for staging, PD, LGD, CCF model, and the reporting module.
- **Banking Digital Transformation**
IBM Open Banking Platform
Integration & Business Process Automation

Presenter: Sanja Trbulin, Account Manager – Ibis Instruments, Nemanja Marković, Senior Consultant
