

7th Installer and Network Advancement Day

June 4th, 2026 | Corso Ancora Riverside Restaurant, Sava Quay, Belgrade

Continuing the tradition of Installer Day, this year we have enhanced the event and adapted its name to better reflect the upgraded program. The new additions include expanded content with a special focus on 5G networks and EMF exposure management, as key aspects in the development of modern telecommunications infrastructure.

AGENDA

Time	Activity	Presenter
09:30 - 10:00	Registration and welcome drink	
10:00 - 11:00	5G Network Performance and EMF Exposure: Measurement Techniques and Challenges Presentation of the ONA 800 device and practical approaches to 5G measurements Wavecontrol portfolio and key EMF topics in modern networks	Genis Sanchez Viavi Solutions Sanja Marković Ibis Instruments
11:00 - 12:00	Optical Technologies: Trends and Latest Advancements Introduction of the new Fujikura 100S splicer Overview of the latest innovations in the optical segment	Sean Wade Fujikura Milorad Sarić Ibis instruments
12:00 - 14:00	Fiber Splicing Competition A practical part of the program focused on skills, speed, and precision in working with optical infrastructure	
14:00 - 16:00	Lunch and Networking Participant gathering with opportunities for networking, experience sharing, and professional connections
